

PHOENIX 4 Carts

The Master of quick change

Pre-assembled - Convenient - Ready-to-go - Fully customizable

Partial flow system for safe pump downs in rough environments

Leak detector and all accessories come fully assembled on the cart

Practical drawer for accessories

Additional power strap for all electric accessories

Extra big wheels to pass challenging uneven grounds

PHOENIX 4 Cart - Leak Detection To-Go

The various pre-designed combinations offer the perfect choice for your needs: All **PHOENIX cart** versions come fully assembled and leak-checked to offer a time-saving, ready-to-go solution. With this, the **PHOENIX carts** guarantee best performance from the minute you turn it on. Plug in and ready to start:

- Fully assembled, leak checked, CE proven and performance tested to offer a safe and convenient plug-and-play solution
- For leak detection in rough environments and/or measurements from atmosphere on, the partial flow system helps to find leaks immediately and in the worst conditions
- For ultimate clean applications, dry pumps with different pumping speeds offer the best safety and performance for your process
- Strong and convenient design for an extra long life

Choose your combination!
